PROMASTAR Receives Certificate Of Appreciation From KAU
For Its Great Efforts & Contribution

A special ceremony was held on November 03, 2010 at King Abdul Aziz University (KAU) to celebrate the completion of the "KAU Core Team" development phase of implementing Oracle Primavera Enterprise Project Portfolio Management and Contract Management. The completion comes as part of the 7-month Turn-Key contract awarded to PROMASTAR to implement Enterprise Project Management System at KAU including Hardware and Software.

The event was attended by KAU Vice President for Projects, Professor Abdullah Omer BaFail, several KAU senior officials and the "KAU Core Team" as well as, PROMASTAR President Engineer Mostafa El-Bakry and PROMASTAR Vice President Engineer Mohammed Bahei.

Professor BaFail assured the management's commitment to support and empower the "KAU Core Team" aiming at ensuring the success of the project; enhancing the KAU Project and Portfolio Management Practices and improving strategic/operational alignment of KAU programs and projects.

During the held ceremony Professor BaFail handed Engineer El-Bakry a certificate of appreciation for PROMASTAR great efforts and professional contributions in this initiative.
From his side, Engineer El-Barky stressed on PROMASTAR's continuous commitment to deliver the highest standard of professional services and highlighted the strategic partnership approach that PROMASTAR is dedicating to KAU.

He also pointed out that PROMASTAR methodology and approach leverage proven processes and tools through its highly skilled and experienced team to ensure the success of the implementation.

It is worth mentioning that KAU is the biggest university in the western province in KSA. It has several Construction Portfolios, which are managed by four Consultants and executed by around 120 contractors.

KAU Project Management Department decided to invest in Oracle Primavera to standardize all the business processes between all project participants. Therefore, the "KAU Core Team" was formed to work on the system deployment.

This team, which consists of representatives of the university as well as each consultant, had been trained on Primavera Products by PROMASTAR consultants to get a clear vision of the system and its capabilities. The team now is ready to start together with PROMASTAR consultants on the readiness assessment to define all the processes and workflows need to be implemented in the systems.

Furthermore, KAU is intending to involve the contractors in the system and PROMASTAR has already provided them with a presentation and demonstration on the system a month ago.

PROMASTAR has formed a team of several consultants to serve the project
